

# Solar power shop

Every time I discuss electrical power as it relates to the shop someone will inevitably bring up the question of solar energy. After all, I'm in the "Valley of the Sun" and if anyone should be able to harness the awesome power of that big ball of fire in the sky it should be Phoenicians with our 296 days of sunshine per year!

In many cases, that means putting no money down to go solar. Solar leases entail fixed monthly payments that are calculated using the estimated amount of electricity the system will produce. With a solar PPA, consumers agree to purchase the power generated by the system at a set price per kilowatt-hour of electricity produced.

Solar lease or PPA: With a solar lease or PPA, you don't own your system, so you don't qualify for some of the best solar incentives. With a solar lease, you pay a fixed monthly lease payment, whereas with a PPA, you agree to purchase the power generated by your system at a set price per kilowatt-hour (kWh).

Solar batteries help to work towards a higher percentage of solar power-based energy solutions. Solar batteries can be quite expensive, but expect the cost of these to come down as the technology becomes more mainstream. As with considering solar power installation in general, break down the cost of a battery and compare it with how much power ...
