Here are some kid-friendly instructions on how to make sugar cookies that resemble the Sun. Music: ... Sunspots are areas on the Sun where the solar magnetic field is particularly twisted up -- this actually cools down the gas in these regions, making them appear dark to our eyes. Sunspots help scientists study the Sun's activity, too!

In this activity, learners use candy pieces and a cookie to make an accurate model of the Sun they can eat. Parts of the delicious model include solar granules, sunspots, and solar prominences. Step-by-step instructions are included with photos. Activity guide includes a ...
