Where are Solarwatt products made?

Solarwatt stands for German premium quality: Our products are developed in Dresden and Hürth and manufactured partially in Dresden with selected production lines abroad. All our products are designed and rigorously tested at our headquarters in Dresden, Germany. Our German factories and offices run on green electricity.

What is Solar Watts?

Solar Watts, which is a subsidiary of Platinum Systems Inc., is known for its commercial and residential electrical installations. It is also backed by sister company LED Illuminations Inc., which retails mainly LED technology including LED bulbs and lighting fixtures. Solar Watt Systems Inc. is the name of the company.

Why should you choose Solarwatt?

Solarwatt has everything you need to generate, manage and store solar electricity for later use. Solarwatt quality is guaranteed to last. Generate your own electricity and boost your independence. SOLARWATT offers everything you need for an economically effective photovoltaic system.

What is Solarwatt & how does it work?

Solarwatt is the only European supplier to produce all the components of a photovoltaic system itself and from a single source - here in Germany.

What is Solarwatt's energy management system?

SOLARWATT's energy management system allows you to use solar energy in the way that makes the most sense for you. Either automatic, or to your specifications. It shouldn't matter whether the sun is shining or not. Store excess solar power instead of feeding it into the grid, only to buy it back later at higher cost.

Where do Solarwatt batteries come from?

Solarwatt obtains original components, such as the battery cells, directly from BMW for production. These are also used in the global corporation's electric cars. Webasto, an international automotive supplier, manufactures the cell module for Solarwatt's energy storage system in Bavaria on behalf of Solarwatt.
