Solid power spac

LOUISVILLE -- Solid Power Inc., the Louisville-based developer of all-solid-state batteries for electric vehicles, will be traded publicly on the Nasdaq exchange after a planned merger with special purpose acquisition company Decarbonization Plus Acquisition Corp. III (Nasdaq: DCRC), a deal that values the company at \$1.2 billion.

EV battery manufacturer Solid Power will merge with Decarbonization Plus Acquisition III, following shareholder approval for the \$1.2 billion deal. The SPAC in the filing said 210,171 shares were redeemed ahead of the vote -- a negligible amount when more than 27.82 million shares were voted in support of the deal, according to an 8-K filing.

The SPAC merger is expected to leave Solid Power with about \$650 million in cash, which the company says will be used to fund operations and support its growth strategy. More specifically, Solid Power CEO Doug Campbell told TD Ameritrade in an interview last month that the capital will assist with scaling the company's production line.
