

Solyndra solar panel company

Who makes Solyndra solar panels?

Solyndra was a manufacturer of cylindrical panels of copper indium gallium selenide (CIGS) thin film solar cells. It was based in Fremont, California. In 2009, the Obama administration co-signed \$535 million in loans to Solyndra.

How do Solyndra solar panels work?

Solyndra's panels achieve effective energy generation when mounted horizontally and spaced closely together, frequently enabling greater rooftop coverage and enhancing energy production over the system's lifetime compared to a conventional panel installation. A partially-shaded panel still generates electricity from the unshaded modules.

What happened to Solyndra solar?

FREMONT, CA - MAY 31: Republican presidential candidate and former Massachusetts Gov. Mitt Romney ... [+] speaks during news conference in front the shuttered Solyndra solar power company's manufacturing facility May 31, 2012 in Fremont, California. The company filed for bankruptcy in 2011 after receiving \$535 million in federal loan money.

Why did Solyndra get a federal loan?

Solyndra's federal loan came from a program created by the 2009 stimulus for companies developing "commercially available technologies," and the company said it would use the funds to invest in its one-of-a-kind technology using cylindrical panels to generate solar energy.

Will Solyndra get a \$535 million loan guarantee?

In a March 2009 press release announcing a \$535 million loan guarantee for Solyndra, the Energy Department said: "This loan guarantee will be supported through the President's American Recovery and Reinvestment Act, which provides tens of billions of dollars in loan guarantee authority to build a new green energy economy."

Why should you choose Solyndra solar panels?

Solyndra's cylindrical design offers proven reliability and superior performance. Each panel is made up of 40 individual modules, wired in parallel for high current, which capture sunlight across a 360-degree photovoltaic surface capable of converting direct, diffuse and reflected sunlight into electricity.

The bankruptcy last month of Fremont, Calif.-based Solyndra comes as solar manufacturing undergoes a major transition. Prices of solar panels have plummeted, causing a supply glut and slicing company revenues. Solyndra's collapse marked the third time in as many weeks that a solar company declared bankruptcy.
