Sun power app

Keep the Lights Shining Bright. Now available with SunPower Equinox®; rooftop solar system, the Tesla Powerwall 3 is an affordable home backup solution offering uninterrupted power and better battery performance, so yours can be the house on the block where the lights shine bright and electricity bills drop. * The ability to power devices during peak times or during outages will ...

Despite the image displayed advertising this "new" app in the former Sunpower monitoring app, which showed a new Sunpower app on an iPad, this app is not optimized for the iPad. That's very misleading. The old app is optimized for the iPad, but this one is not. While the app opens on the iPad, it is displayed as a smaller screen like it ...

In your mySunPower app: Tap the PROFILE tab. Tap SunVault Info. Tap RESET BATTERY. Note: Resetting your SunVault using the mySunPower app requires that SunVault be connected to the internet through WiFi, Ethernet, or cellular. If communications are down during the power outage, please confirm that your router and modem have power and check the ...

SunPower Pro Connect is a new and improved commissioning app for SunPower dealers and installing partners. Users now connect and configure devices directly via a smartphone and the Pro Connect app. Dealers and installing partners can now easily download the SunPower Pro Connect from the Apple Store and the Google Play Store. Key Features

To register a new email, please log out of the app and follow the account creation workflow with the new email address. You'll need the serial number from the PVS unit. Note: this creates a new account, it does not remove or delete the prior account. You can also call our support team at SunPower Support 1-800-786-7693.

Cost Savings mode enables you to limit your use of grid energy during peak times, when electricity is most expensive. Typically, Time-Of-Use (TOU) rate plans offer lower rates during daytime hours and higher rates in the evening. So, by storing electricity when rates are lower and using it when rates are at their highest, you can optimize your savings.

A SunPower Equinox®; Hub is installed at your home. This device collects production data from your solar system, as well as energy consumption if enabled. This data is then transmitted to SunPower servers and displayed on your app. Using the web application: On your dashboard, you'll see a gauge that tells you if your system is now producing ...
