

Sun power solar arizona

Arizona State University solar array. The first commercial solar power system in the state was a 95 kilowatt (kW) single-axis tracking photovoltaic plant in Flagstaff, Arizona, opened in October 1997 and operated by Arizona Public Service (APS). [2] [3] In 1999, the city of Scottsdale covered an 8,500 square feet (790 m²) parking lot with photovoltaic panels, to both provide shaded ...

However, according to Google's Project Sunroof, Phoenix is far from achieving its full solar potential. Project Sunroof estimates that Phoenix could generate up to 14.8 million megawatt hours (MWh) annually if 98% of buildings in the city ...
