In the quest for the ultimate combination of battery backup and surge protection, the UPS-in-surge protector question has been asked for years, with no clear-cut answer. Many recommend plugging a UPS into a surge protector; yet, many others don't. ... A surge protector is a power strip on steroids. On any given day, it serves as a multiple ...

TL;DR: When you want a reliable UPS, APC is one of the top brands for the job, and its BR100MS2 is a fantastic UPS for home and office use has ten standard outlets with surge protection (six with battery backup) and USB-A and USB-C charge ports. The 900W capacity can keep your devices running for quite some time.

6 days ago&#0183; Differences: The main difference between a surge protector and a power strip is that the surge protector contains an MOV. The MOV diverts harmful electrical surges from connected devices. A basic power strip does not have an MOV. Its chief function is to expand the number of plug-ins available on an electrical outlet.; Similarities: Some power strips have surge protection.
