

5 &#0183; Tadiran Lithium Thionyl Chloride Batteries are designed to provide high performance power in less space. These lithium thionyl chloride (Li/SOCl<sub>2</sub>) cells feature greater energy density, up to 710Wh/Kg and 1420Wh/I. Tadiran Li/SOCl<sub>2</sub> have an open circuit voltage of 3.67V, an operating voltage of up to 3.6V, and -55&#176;C to +125&#176;C ...
