

# Universal power switch battery backup review

Why should you buy a UPS battery backup?

Whether that's a blackout, brownout, or power surge, the best UPS battery backup will give you the time to save what you're doing and turn off your machine safely. Power surges and interruptions can be bad news for PC components, so what you're buying is peace of mind more than anything else.

Is the APC ups be425m a good battery backup?

If you need a UPS and don't want to spend a lot, the APC UPS BE425M Battery Backup is for you. Its 425VA/225W power won't keep your desktop computer running for several minutes after a blackout, but it's perfect if you have a few smaller devices you need to keep powered up.

Does a sinewave ups have a battery backup?

Battery backup extends to five outlets at once, and you can monitor them all using the front-panel LCD readout. This isn't a sinewave UPS, so its power isn't quite as "clean" as some UPS systems, but that means it's less well-suited to sensitive electronics at the professional level.

Does your PC know the difference between UPS battery power and wall power?

Essentially, your PC shouldn't know the difference between your UPS battery power and the power coming from the wall. Simulated sine-wave UPS delivers a stepped, approximated waveform using pulse-width modulation (PWM). That's the same concept used to control PC case fan RPM.

Is Cyberpower cp1500pfclcd a good battery backup?

And if that's the case, then the CyberPower CP1500PFCLCD is in the same price range. It's line interactive with AVR, so it will treat your devices well, but also has that sweet tilting color LCD display. A UPS (uninterruptable power supply) is a battery backup that keeps your computer running during a power failure.

Which APC battery backup is best?

The APC BR1500G is an excellent battery backup with AVR and surge protection. It allows for easy cell replacement and the ability to add external backups. If you need a UPS and don't want to spend a lot, the APC UPS BE425M Battery Backup is for you.
