

U.S. Department of Energy's Joint Center for Energy Storage Research

What is the Joint Center for Energy Storage Research (JCESR)?

The Joint Center for Energy Storage Research, or JCESR, is a partnership that brings together researchers, engineers, and manufacturers who share the goal of developing new, clean energy storage technologies for vehicles, the electric grid, and beyond.

What is a JCESR hub?

The mission of these Hubs is to advance promising areas of energy science and engineering from the earliest stages of research to the point of commercialization. JCESR's research focuses exclusively on the development of next-generation, beyond-lithium-ion batteries.

Which DOE laboratories are part of JCESR?

Along with Argonne, JCESR partner institutions include four other DOE laboratories--Lawrence Berkeley National Laboratory, Pacific Northwest National Laboratory, SLAC National Accelerator Laboratory, and Sandia National Laboratories--along with the Army Research Laboratory, 11 universities, and one private firm.

This week, U.S. Deputy Secretary of Energy David M. Turk traveled to Dubai, United Arab Emirates for the 28th Conference of the Parties to the U.N. Framework Convention on Climate Change (COP28), where he led the U.S. energy delegation. The Department of Energy announced a range of initiatives - on issues from clean hydrogen and nuclear ...

Venkat Srinivasan, an Argonne National Laboratory Senior Scientist, is the Director of the Joint Center for Energy Storage Research. From 2013 to 2023, he served as JCESR Deputy Director, Research and Development, helping to implement the scientific mission of the center.. Srinivasan is also director of the Argonne Collaborative Center for Energy Storage Science (ACCESS).

Edward Maginn is the Keough-Hesburgh Professor in the Department of Chemical and Biomolecular Engineering at the University of Notre Dame. ... Please join us at Argonne National Laboratory on Tuesday, April 4, 2023 for JCESR and Beyond: Translating the Basic Science of Batteries. ... and Director of the Joint Center for Energy Storage Research ...

Batteries and Energy Storage Hub: the Joint Center for Energy Storage Research (JCESR) JCESR is a major research partnership that integrates government, academic, and industrial researchers from many disciplines to overcome critical scientific and technical barriers and create new breakthrough energy storage technology. Download JCESR fact sheet

Grid Storage Launchpad will create realistic battery validation conditions for researchers and industry .

Us department of energy s joint center for energy storage research

WASHINGTON, DC - The U.S. Department of Energy's (DOE) Office of Electricity (OE) is advancing electric grid resilience, reliability, and security with a new high-tech facility at the Pacific Northwest National Lab (PNNL) in Richland, Wash., where pioneering ...

Below is a comprehensive list of articles, events, projects, references and research related content that is specific to the organization described above. Use the filter to narrow the results further or please visit Joint Center for Energy Storage Research for more information.

Keywords: energy storage, Joint Center for Energy Storage Research, batteries, transportation, grid The global energy system has experienced dramatic changes since 2010. Rapid decreases in the cost of wind and solar power generation and an even steeper decline in the cost of electricity storage (Fig. 1) have made renewable power plants ...

The global energy system has experienced dramatic changes since 2010. Rapid decreases in the cost of wind and solar power generation and an even steeper decline in the cost of electricity storage (Fig. 1) have made renewable power plants increasingly competitive with conventional fossil alternatives. The emergence of electric vehicles promises to disrupt the ...

The portfolio includes industry cost-shared technology development projects, university research grants, collaborative work with other national laboratories, and research conducted in-house through the National Energy Technology Laboratory's (NETL) Research and Innovation Center. The Carbon Storage Program is administered by the FE Office of ...

Persson serves in several scientific leadership roles, including in the Department of Energy's Joint Center for Energy Storage Research and Battery Materials Research Program. She is also the Director of the Materials Project, which provides free materials data and attracts over a hundred thousand users worldwide, where the battery cathode ...

This work was supported as part of the JCESR, an Energy Innovation Hub funded by the US Department of Energy, Office of Science, Basic Energy Sciences. ... Image credit: Ellen Weiss (Joint Center for Energy Storage Research, Lemont, IL). Proceedings of the National Academy of Sciences. Vol. 117 | No. 23 June 9, 2020. PubMed: 32513683 ...

Around this same time, the US Department of Energy (US DOE) established Energy Innovation Hubs to apply leading-edge science and technology at scale to the world's most pressing energy challenges. At the launch of the Joint Center for Energy Storage Research (JCESR) in 2012, Li-ion batteries had in-

The Joint Center for Energy Storage Research (JCESR) was headquartered at Argonne during the period 2012-2023. Established in 2024, Argonne is leading the Energy Storage Research Alliance (ESRA) with co-leads Lawrence Berkeley National Laboratory and Pacific Northwest National Laboratory.

The Joint Center for Energy Storage Research (JCESR), a DOE Energy Innovation Hub, is a major partnership that integrates researchers from many disciplines to overcome critical scientific and technical barriers and create new breakthrough energy storage technology. Led by the U.S. Department of Energy's Argonne National Laboratory, partners ...

Within JCESR are institutions working across all stages of the innovation chain, from national laboratories and universities to industry. JCESR has the combination of national laboratories, universities, industry and key experts to meet the vision, mission, goals, and objectives of the Hub in one centrally managed organization.

LEXINGTON, Ky. (Nov. 19, 2018) -- The University of Kentucky has been named a partner on a \$120 million, five-year second phase of the Joint Center for Energy Storage Research (JCESR), a U.S. Department of Energy (DOE) Innovation Hub focused on advancing battery science and technology. Susan Odom, an associate professor of chemistry in the UK College of Arts and ...

Please join us at Argonne National Laboratory on Tuesday, April 4, 2023 for JCESR and Beyond: Translating the Basic Science of Batteries. ... and Director of the Joint Center for Energy Storage Research (JCESR), who passed away unexpectedly on January 23. Dr. Read More. January 13, 2023, Research Highlights ... U.S. Department of Energy Office ...

The official end of the Joint Center for Energy Storage Research (JCESR) innovation hub occurred in June 2023 after more than a decade of research and development dedicated to one of humanity's most pressing challenges: the development of a better battery to help usher in... Read More. March 7, 2023, News Articles

May 9, 2024, News Articles JCESR Concludes Decade-Long Mission, Leaves Lasting Impact on Battery Science The official end of the Joint Center for Energy Storage Research (JCESR) innovation hub occurred in June 2023 after more than a decade of research and development dedicated to one of humanity's most pressing challenges: the development of a better battery ...

Sandia is a national security laboratory with a long history of leading research and development of energy storage technologies. We have cradle-to-grave responsibility for all power sources for Department of Energy defense programs, and apply our expertise to support Department of Defense applications. Learn More

Joint Center for Energy Storage Research to drive battery and energy storage technology Oct 11, 2013 In late 2009, U.S. Department of Energy Secretary Steven Chu outlined the Department's plan to establish and

Us department of energy s joint center for energy storage research

operate Energy Innovation Hubs focused on accelerating discovery and development in key areas of U.S. energy research.
