I have a 1980s vintage Suncatcher solar hot water heater system, installed by the original owners of the house to heat a hot tub that is no longer present. It feeds the domestic hot water, supplemented by a normal natural gas water heater. The system was high-end for its time - copper pipe, silicone heat transfer fluid - and

Used solar water heater panels for sale

The propane water heater on most RV's are about 8 gallons, perfect size for one of Heliatos" solar water panels. In speaking with customer service I found them to be very friendly, highly knowledgeable and most helpful in offering prep installation advice.

In the USA, solar powered water heaters are commonly used. Flat panels are a metal box which has a glass front that allows the ultraviolet rays of the sun to pass through, making them a common choice for solar water heating. At the back of the box, there is an absorbing material that collects the heat.

A solar hot water system is a renewable energy technology that harnesses the power of the sun to provide heat for domestic hot water purposes, much like traditional solar panels. The basic principle behind solar hot water heating is the conversion of sunlight into heat energy. If you'd like to learn more about the differences between solar PV and solar thermal, check out our Solar ...
