(Yicai Global) Sept. 20 -- Shares in Yunnan Wenshan Electric Power advanced today after the Chinese hydroelectric power generator said it will invest CNY12.7 billion (USD1.8 billion) to build two pumped storage power stations in southern Guangdong province to better cater for the rapid increase in renewable energy electricity generation.

1. Cost Savings: In certain markets businesses can benefit from peak demand shaving and time-of-use pricing when they use energy storage. They can reduce their electricity costs by storing energy during off-peak hours when rates are cheaper and using stored energy during peak demand periods when grid electric prices are higher. This helps them avoid peak use demand ...
