

How much storage does the powerbank provide?

Households who are part of the PowerBank trials can automatically store up to 6kwh or 8kwh of excess or unused solar power in the battery. The storage capacity that will be recommended to you is based on your existing household energy usage.

Does Western power offer network support services?

Western Power is inviting expressions of interest from NCESS providers to deliver network support services at up to five metropolitan locations. Five distribution feeders have been selected based on Western Power's assessment of their underlying needs, technical requirements, and the potential for a viable non-network solution.
