Could a solar farm be built in Woodland NC?

The story was about a potential solar farm in Woodland, North Carolina, a town with just over 800 residents. The town council was considering making a zoning change to allow a solar farm to be built on a piece of land just outside town. If approved, it would be the fourth solar farm permitted around the town.

Is woodland rezoned for a solar farm?

The town of Woodland, North Carolina is in the spotlight this week after rejecting a proposal to rezone a section of land just outside its borders for the use of a solar farm. Three solar farms have already been approved in the area, but the local residents are seemingly not impressed.

Why did the Woodland town council reject a solar farm proposal?

The Woodland Town Council rejected a proposal to rezone a section of land north of town to M2 (manufacturing) from RA (residential/agricultural), essentially denying approval of a solar farm ... Later in the meeting, the Town Council voted for a complete moratorium on solar farms.

Why did North Carolina residents reject solar panels?

Residents of a North Carolina town rejected the local installation of a solar farm over fears the technology was harmful. A North Carolina town rejected the further installation of solar panels; some residents registered fears that the panels would disrupt the local ecosystem, while many others worried property values would be affected.

Will solar farms kill woodland?

Bobby Mann said he watched communities dry up when I-95 came along and warned that would happen to Woodland because of the solar farms. "You're killing your town," he said. "All the young people are going to move out." He said the solar farms would suck up all the energy from the sun and businesses would not come to Woodland.

Will solar farms get the go-ahead in woodland?

The area just outside Woodland is a popular spot for solar farm developers, because it has an electrical substation, which means the panels can be hooked up to the national grid. While construction has started on one of the three farms that have already been approved for the area, it's unlikely this fourth one will get the go-ahead.

An off-grid solar cabin kit also helps reduce your carbon footprint, as solar energy is a renewable power source that doesn't produce greenhouse gases or air pollution during operation. By using PV panels instead of traditional electricity, you're choosing a more environmentally friendly option.
